Molecular Genetics of Drug Resistance forms a vital and timely review of the genetic processes behind drug resistance. Starting with an overview of the area, each chapter focuses on a particular target with important sections on drug resistance in malaria and in cancer.

An insightful examination of the changing relationship between Asia and the United States In this lucidly written and thought-provoking book, author Simon Tay highlights the accelerating trends that point to Asia increasingly forging its own path, independent of the United States. He also describes the fundamental changes and new policy directions needed to maintain and strengthen the bonds between Asia and the United States that have been beneficial to both since the end of the Second World War. On the eve of the global financial crisis of 2008, the economies of the United States and its Asian partners were deeply interdependent. But the different approaches taken to the crisis by Asian and Western leaders point to a new separation that may have negative consequences for the economies and business-

es of both regions. To avoid a dangerous divide that may make us all the poorer, Tay reveals what leaders, policy-makers, companies, and citizens can do to find a balance that enriches us all. Written by a leading public intellectual CNN's Fareed Zakaria describes as "one of the most intelligent and reliable guides to the region" Touches on major issues in foreign policy and economics that will impact Asian nations and the United States over the near future Explains the changing nature of economic relations in the global economy For foreign policy followers, politicians, and businesspeople, Asia Alone charts a path forward—together. The classic cookbook from “the first lady of Southern cooking” (NPR), featuring a new foreword by the James Beard Award-winning chef Mashama Bailey. Decades before cornbread, shrimp and grits, and peach cobbler were mainstays on menus everywhere, Edna Lewis was pioneering the celebration of seasonal food as a distinctly American cuisine. In this James Beard Foundation Cookbook Hall of Fame-inducted cookbook, Miss Lewis (as she was almost universally known) shares the recipes of her childhood, spent in a Virginia farming community founded by her grandfather and his friends after emancipation, as well as those that made her one of the most revered American chefs of all time. Interspersed throughout are personal anecdotes, cooking insights, notes on important Southern ingredients, and personally developed techniques for maximizing flavor. Across six charmingly illustrated chapters—From the Gardens and Orchards; From the Farmyard; From the Lakes, Steams, and Oceans; For the Cupboard; From the Bread Oven and Griddle; and The Taste of Old-fashioned Desserts—encompassing almost 200 recipes, Miss Lewis captures the spirit of the South. From Whipped Cornmeal with Okra; Pan-Braised Spareribs; and Benne Seed Biscuits to Thirteen-Bean Soup; Pumpkin with Sautéed Onions and Herbs; a Salad of Whole Tomatoes Garnished with Green Beans and Scallions; and Raspberry Pie Garnished with Whipped Cream, *In Pursuit of Flavor* is a modern classic and a timeless compendium of Southern cooking at its very best.

!! 55% OFF FOR BOOKSTORES !! Vegetarianism is not a new concept; it has been practiced since ancient times in India during the Vedic period (1500-500

BC) as well as in Greece and Rome. It continues to be practiced today in modern society around the world. In most cases, it is a matter of individual choice. Eating meat and fish has been a common practice all over the world for thousands of years. In some cultures, the preparation of the meat or fish symbolizes wealth and luxury, while in others it represents a source of survival. Today, people are becoming more aware of the impact that their food choices have on their health as well as on the environment. Why do people become vegetarians? The reasons vary widely from person to person. Some people object to the cruelty and suffering of animals raised for food. Some people object to the environmental effects of producing meat and fish. Others become vegetarians because they believe animal flesh is unhealthy to eat or because they believe it is unspiritual or unwise. For some, it is a choice of economic necessity. This vegetarian cookbook will help you get a delicious and healthy recipe on the table that will make your life less stressful. family food in the same amount of time you'd need to order take-out! Secret Agent Mark Kirkland has been given the task of locating and retrieving three pornographic films. His mission

must remain top secret as the films, rather embarrassingly, feature the daughter of the future president of the United States. His quest leads him to the depths of Bavaria where he finds Soviet agent, Malik, and sidekick Lu Silk also rather interested in the whereabouts of the films. Who will find them first? And once found, who's to say they won't immediately disappear again?

This is a curated and comprehensive collection of the most important works covering matters related to national security, diplomacy, defense, war, strategy, and tactics. The collection spans centuries of thought and experience, and includes the latest analysis of international threats, both conventional and asymmetric. It also includes riveting first person accounts of historic battles and wars.- Some of the books in this Series are reproductions of historical works preserved by some of the leading libraries in the world. As with any reproduction of a historical artifact, some of these books contain missing or blurred pages, poor pictures, errant marks, etc. We believe these books are essential to this collection and the study of war, and have therefore brought them back into print, despite these imperfections. We hope you enjoy the unmatched breadth and depth of this collection, from the historical to the just-published works.

Forget everything you thought you knew about Henry the Eighth. While Henry VIII has frequently been portrayed as a womanizer, author Philippa Jones reveals a new side to his character. Although he was never faithful, Jones sees him as a serial monogamist: he spent his life in search of a perfect woman, a search that continued even as he lay dying. This book brings together for the first time the 'other women' of King Henry VIII. When he first came to the throne, Henry VIII's mistresses were dalliances, the playthings of a powerful and handsome man. However, when Anne Boleyn disrupted that pattern, ousting Katherine of Aragon to become Henry's wife, a new status quo was established. Suddenly noble families fought to entangle the king with their sisters and daughters; if wives were to be beheaded or divorced so easily, the mistress of the king was in an enviable position. Yet he loved each of his wives and mistresses, he was a romantic who loved being in love, but none of these loves ever fully satisfied him; all were ultimately replaced. "The Other Tudors" examines the extraordinary untold tales of the women who Henry loved but never married, the mistresses who became queens and of his many children, both acknowledged and unacknowledged. Philippa Jones takes us deep into the web of secrets and deception at the Tudor Court and explores another, often unmentioned, side to the King's character.

Recent advances in electronic and computer technologies have paved the way for the proliferation of ubiquitous computing and innovative applications that incorporate these technologies. This proceedings book describes these new and innovative technologies, and covers topics like Ubiquitous Communication and Networks, Security Systems, Smart Devices and Applications, Cloud and Grid Systems, Service-oriented and Web Service Computing, Embedded Hardware and Image Processing and Multimedia.

Biomedical transducers are essential instruments for acquiring many types of medical and biological data. From the underlying principles to practical applications, this new book provides an easy-to-understand introduction to the various kinds of biomedical transducers. The first comprehensive treatment of this subject in 20 years, the book presents state-of-the-art information including: discussions of biomedical transducers for measure-

ments of pressure, flow, motion, temperature, heat flow, evaporation, biopotential, biomagnetism, and chemical quantities. Chapters are devoted to particular areas of instrumentation needs

Carried aloft, peacefully gliding on the thermals of time, no one is ever prepared for APOCALYPTIC WINDS. A mysterious virus known only as V-1 wiped out most of humanity before Charlene was even born. Now, the New Army Of God is expanding New Dixie's borders ever north and westward, murdering and enslaving people as they go. Charlene, Jackson, and the community of Marysville are in the New Army's path, but the deranged white supremacists aren't the greatest danger they face. The threat posed by the Narmy is nothing compared to the dwindling numbers of men who survived V-1. It has been more than twenty years since a male child was born to those few people who survived the great dying. Five hundred miles west of Marysville in Midpark, another group of V-1 survivors is faced with the same dilemma. How can humanity survive if every baby born is a girl? A man who Charlene knows only from visions may have the answer. He knows the V-1 virus that wiped out most of humanity somehow changed the DNA of those who survived. Now, he is in a race against time to recreate the technology needed for sequencing and altering human DNA. Charlene knows her destiny is linked to the man in her visions. What she doesn't know is how they are connected or where to find him. What she does know is that somehow the fate of humanity depends on her and Jackson finding this mystery man. Somehow, somewhere in time, the three of them, along with one other, are all connected. The four of them together hold the key

to mankind's future. Will they find each other in time?

Covers the life and career of American poet, essayist, and lecturer Ralph Waldo Emerson, including the most important and representative responses to his writings through the end of the 19th century.

The "Autodesk(r) Revit(r) Architecture 2015 Review for Certification" guide is intended for users of the Autodesk Revit Architecture software who are preparing to complete the Autodesk Revit Architecture 2015 Certified Professional exam. This guide contains a collection of relevant instructional topics, practices, and review questions from the Autodesk Official Training Guides (AOTG) training guides created by ASCENT - Center for Technical Knowledge(r) and pertaining specifically to the Certified Professional exam topics and objectives. Prerequisites: This training guide is intended for experienced users of the Autodesk Revit Architecture software in preparation for certification. New users of the software should refer to the AOTG training guides from ASCENT, such as Autodesk Revit 2015 Architecture Fundamentals, for more comprehensive instruction. Autodesk recommends 400 hours of hands-on software experience before taking the Autodesk Revit Architecture 2015 Certified Professional exam.

Governance in the Middle East is topic of interest to scholars, activists and policy makers. The currently proposed book is intended to present the first comprehensive framework of the question of governance in the Middle East in its various forms and manifestations: political, economic, and government performance. This study will supply the context that is missing in the existing literature on, perhaps, the last bastion of authoritarianism

in the world. Proposed Contents This book will be structured into two parts: Part I (Chapters 1-11) provides some theoretical background and analyzes the patterns and challenges of governance in the Middle East, providing some global context; Part II (12-Conclusion) will examine specific cases in selected countries and regions in the Middle East. Part I: Theory and Context Chapter 1 will be an introduction describing the main aspects of the book and highlighting the main points made by the contributors. Chapter 2 will present the theoretical dimensions of governance and review the "state of the discipline" and the latest trends in the literature on governance. The author of this chapter will be an authority in the subject of governance, but does not have to be necessarily a Middle East scholar. Chapter 3 will examine the general political trends in the Middle East and provide a historical background: nation-state formation, colonial and postcolonial experiences in the Middle East and the nature of the Middle Eastern political environment at the present time. Chapter 4 will look into the economic aspects of governance in the Middle East and contextualize the economic challenges and deficiencies affecting the region. Chapter 5 will examine the areas of success and failure in government performance in the region and the aspects of human development. Chapter 6 will look into the role of religion in shaping the governance in the Middle East. After all, most Middle Eastern governments declare Islam as the State religion, while a few consider Islam the source of governance and legislation (e.g. Saudi Arabia and Iran). Chapter 7 will shed light on the sectarian division among Muslims (Shi'a vs. Sunnis) and the significance of this division for the governance, particularly in countries

where the ruling groups belong to a different sect than the governed, such as Bahrain, Saudi, Kuwait and Lebanon. Chapter 8 will examine relation between the state of governance in the Middle East and the progress of human rights, or lack thereof. The Middle East remains one of the most troubling regions on human rights and the respect for human dignity. All of the region's governments are heavily implicated in very serious violations of the most basic in human rights. Chapter 9 will focus on the status of women in the Middle East and the governmental performance in the region in relevance to women rights and status. The recent years have witnessed many positive changes in this regard, but there remains a lot of work to be done, which is going to be outlined in this chapter. Chapter 10 will look into the role of oil and other natural sources in shaping the economic and political performance of Middle Eastern governments. Also, it will shed light on the various ways these governments distribute the revenues (rents) from these resources and how they use them, or don't, in the development of their countries or, in most cases, on the military and state oppressive machine. Chapter 11 will examine the role of international organizations and trade agreements on the performance of governments and whether or not such factors influence or shape governance in the region. It is well-known that Turkey has changed many of its laws and social policies in response to the demands of EU members and in hopes of being admitted into the EU. The chapter will elaborate on this and similar cases throughout the region. Part II: Case Studies Chapter 12 will examine the case of Iraq. The country is experiencing perhaps the most dramatic scenarios of governance in the region. This chapter will shed light on the

unfolding political process and the struggle of Iraqis to forge a path toward democracy in a region determined to resist any political change within its boundaries. Key issues: Power-sharing, pluralism, federalism, ethnic and sectarian conflict, trust-building, corruption and political violence. Chapter 13 will examine the case of Iran. Thirty years after the Islamic Revolution, Iran is entering into a soul-searching phase in its history. The ongoing battle between the reformers and the hardliners is only a sign on the larger problem of governance. A majority of Iranians have no personal recollection of the problems that led to the Revolution. It is vitally important that the government changes its claims to legitimacy from being the force that toppled the Shah to being the provider of prosperity and development of the country and its young population. Key issues: Political reform, human rights, reconciliation with the West, allocation of resources and services. Chapter 14 will examine the case of Egypt. The country is facing an unknown future with President Mubarak reaching advanced age. The debate over his succession is dividing the country in a dramatic way. Egypt is also a country with depleted infrastructure and an ever-shrinking middle class. If the country falls into a violent cycle after the looming departure of Mubarak, the entire region could fall into the abyss. Key issues: Succession of Mubarak, economic performance, services, religious extremism (Muslim Brotherhood) and Nationalism. Chapter 15 will examine the case of Israel. While politically different from its neighbors, Israel is sinking fast into the same problems that plague the Middle East. The country suffers political corruption and many leadership crises. The government is trying to redefine the identity of the state, which is going to create a

showdown with the fast-growing non-Jewish Israeli population, and there is the problem of the government's inability to conclude peace with Israel's neighbors. Key issues: corruption, violence and security. Chapter 16 will examine the case of Saudi Arabia. The country is perhaps the most authoritarian regime in the world. The lack of individual liberties and abuses of human rights are the main problems. The government's treatment of its Shia subjects (approx. 12% of the population) as second-class residents is extremely troubling. The country does not have a meaningful public participation and the Royals who run the government have no accountability to anyone. Key issues: human rights, religious freedom, political reform, public participation. Chapter 17 will examine the case of Bahrain. This small country in the Persian Gulf is facing many challenges. Like Iraq before 2003, it is a country with a clear Shia majority ruled by a small Sunni minority. The Shia are excluded from the government (they were allowed to run for the parliament in the last election for the first time), the military and many other important arenas. The government uses the naturalization of Sunnis as a political tool to change the demographic balance in the country. Key issues: political reform, popular participation, naturalization, human rights. Chapter 18 will examine the case of Yemen. The current struggle over government performance and fairness toward the South has given rise to the calls for separation of the two parts of Yemen. Also, there is the issue of religious freedom, which cases the ongoing war with the Houthi faction that accuses the government of making alliance with the Saudi government and the Sunni extremists in the country to form an existential threat to Shi'ism. Yemen is also a country with many ungoverned

spaces and the governance in the "governed" areas is abysmal. Key issues: political violence, human and religious rights, terrorism, tribalism and poverty. Chapter 19 will examine the case of Turkey and its impressive rise as a model for a strong Muslim nation which tries to reconcile Islam and democracy. Turkey's longstanding problems with social rights, especially of its 12 million Kurds, have always been a formidable challenge to the image of the nation. However, the country's bid to join the EU has forced many changes that inadvertently helped the government's international standing. Chapter 20 will examine the case of Syria and the influence of the Arab nationalist ideology on keeping the country as one of the most oppressive regimes in the region. Also examined will be the affect of Syrian-Israeli conflict on the country's governance. Chapter 21 examines the case of Lebanon. This country which witnessed more governance challenges than any other in the region makes a very interesting case study. The country's sectarian politics and the client-patron relations and loyalties among the various Muslim and Christian elements of society have undermined the country's potential to become a fully democratic state. Chapter 22 will focus on the case of Sudan. This country has been in the center of world attention because of the internal conflict and the accusations of serious violations of human rights and the rise of separatist movements that receive much foreign sympathy and support. The country has missed many opportunities to attain social and political reconciliation, but it should not be considered a lost cause. There is a lot of potential in the country, especially when we consider the vibrant politics of government and opposition. Chapter 23 will examine the case of Jordan and the

role of the uniqueness of the regime in creating relative social and political stability. Unlike the most of the governments in the region, the Jordanian Monarchy keeps the government as a convenient buffer between the Royals and the people. When popular sentiments turn very negative, the King, acting as the good cop, dismisses the government and orders the formation of a new one. Also, Jordan has achieved some good success in absorbing the Islamist groups into the political system, but not without challenges. The chapter will also focus on the Palestinian factor - Palestinians make more than half of the Jordanian population. Chapters 24, 25 & 26 will examine the Maghreb states (Morocco, Algeria and Tunisia). These states face many challenges in their governance: separatism, terrorism and the government oppressive history in Morocco; the Islamism challenge, internal war in the tribal areas and ethnic conflict in Algeria; and the stifling of personal freedom and liberties in Tunisia in the name of secularism and the war on extremism are all challenges that need to be highlighted in a chapter about each country. Chapter 27 will focus on governance in Libya. Having ruled the country for forty-seven years, the Libyan president is the dean of Middle Eastern dictators. He has taken his country through all kinds of political adventures. The rule through popular committees is a unique system that gives Col. Mu'ammar Qadhafi the opportunity to oppress through popular participation and acquiescence. Chapter 28 will focus on the governance in the United Arab Emirates. This confederation of seven emirates has witnessed some excellent success in the economic and infrastructural development, especially in Dubai, which competes with the richest cities in the world, thanks to the energy

and vision of its Emir, Muhammad b. Rashid. While it is generally considered much better than its fellow Gulf States, the UAE has its own challenges, especially in light of the absence of unified system of governance, because each emirate has the autonomy to shape its internal affairs. Chapter 29 will examine the governance and, in certain cases, lack thereof in the countries that form the Horn of Africa, i.e. Somalia, Eritrea and Djibouti. These countries face some tremendous challenges in the areas of refugees, resources, stability and ethnic & conflict. The failure of these states, as seen in the case of Somalia, can make the problems of security in the whole region much worse than it is now. Famine and anarchy have already led to wars, piracy and the flood of refugees, not to say much about the humanitarian catastrophes in the region. This chapter will highlight the problems of governance in these often forgotten countries. Chapter 30 will be a conclusion and final remarks on the general framework of the regional governance and the way forward. This book is aimed at a wide variety of audience. Policy makers, policy analysts, as well as journalists will benefit from the history and analysis that will be presented in the book. Also, academics will find in the book important materials for research and class work. Professors teaching courses on US Foreign policy, Middle East, International Relations, Comparative Politics and many related fields will find the book a very suitable choice for their students to read. Given the media and general public's interest in the Middle East and the Middle East, the book will also appeal to a wide range of educated readers in the United States, the United Kingdom and many other countries world-wide.

This book, by one of the most prominent

interpreters of Leo Strauss's thought, was the first to address the problem that Leo Strauss himself said was the theme of his studies: the theologico-political problem or the confrontation with the theological and the political alternative to philosophy as a way of life. In his theologico-political treatise, which comprises four parts and an appendix, Heinrich Meier clarifies the distinction between political theology and political philosophy and reappraises the unifying center of Strauss's philosophical enterprise. The book is the culmination of Meier's work on the theologico-political problem. It will interest anyone who seeks to understand both the problem caused by revelation for philosophy and the challenge posed by political-religious radicalism. The appendix makes available for the first time two lectures by Strauss that are immediately relevant to the subject of this book and that will open the way for future research and debate on the legacy of Strauss.

Jackson's text successfully illustrates the integration between statistics and research methods by demonstrating the ways to use statistics in analyzing data collected during research. Jackson's combined text adopts an inviting narrative style that speaks directly to students and draws them into the material, overcoming the initial apprehension students may feel at having to learn both subject areas at once. She incorporates a student-friendly critical thinking approach and presents examples and exercises to which students can relate. Jackson clearly focuses on the logic of the process and the methodology aspect of research.

This volume contains 29 engrossing chapters contributed by worldwide, leading research groups in the field of chemical biology. Topics include pre-biology;

the establishment of the genetic code; isomerization of RNA; damage of nucleobases in RNA; the dynamic structure of nucleic acids and their analogs in DNA replication, extra- and intra-cellular transport; molecular crowding by the use of ionic liquids; new technologies enabling the modification of gene expression via editing of therapeutic genes; the use of riboswitches; the modification of mRNA cap regions; new approaches to detect appropriately modified RNAs with EPR spectroscopy and the use of parallel and high-throughput techniques for the analysis of the structure and new functions of nucleic acids. This volume discusses how chemistry can add new frontiers to the field of nucleic acids in molecular medicine, biotechnology and nanotechnology and is not only an invaluable source of information to chemists, biochemists and life scientists but will also stimulate future research.

The leading expert in the field brings the power of his experience and that of the world-renowned consulting firm Booz-Allen & Hamilton to reveal how buying smart can mean the difference between success and failure.

Development of the Leopard 1 can be traced back to November 1956, when the operational requirement for a new battle tank was formulated by the Federal German Armed Forces (Bundeswehr). Originally a Franco-German project, the tank under design was named the 'Standard-Panzer'. The French later dropped out, however, and on 1 October 1963 the 'Standard' tank was officially named 'Leopard', an appropriate choice considering Germany's wartime pedigree with the formidable Tiger and Panther. This book traces the development and service record of the Leopard 1, detailing its control systems, modifications and variants.

Thermodynamics Seventh Edition covers the basic principles of thermodynamics while presenting a wealth of real-world engineering examples so students get a feel for how thermodynamics is applied in engineering practice. This text helps students develop an intuitive understanding of thermodynamics by emphasizing the physics and physical arguments. Cengel/Boles explore the various facets of thermodynamics through careful explanations of concepts and its use of numerous practical examples and figures, having students develop necessary skills to bridge the gap between knowledge and the confidence to properly apply knowledge. The media package for this text is extensive, giving users a large variety of supplemental resources to choose from. A Student Resources DVD is packaged with each new copy of the text and contains the popular Engineering Equation Solver (EES) software. McGraw-Hill's new Connect is available to students and instructors. Connect is a powerful, web-based assignment management system that makes creating and grading assignments easy for instructors and learning convenient for students. It saves time and makes learning for students accessible anytime, anywhere. With Connect, instructors can easily manage assignments, grading, progress, and students receive instant feedback from assignments and practice problems.

This book explores the significance of silence within and beyond pedagogical contexts. Silence is a complex and multidimensional phenomenon for everyday life: since schools mirror society, it is also significant in education. While silence can be experienced in a multitude of different ways, the author reflects on whether silence itself can bear a message: is there an aspect of dialogue in silence, or is it a language all of its own?

This book examines a variety of silences essential for education, examining such topics as silence and aspects of power, silent students, and the relationship between listening and silence. Drawing on a range of empirical data, the author elucidates the significance of silence in pedagogical contexts.
