Palestine Education System and Policy Handbook

Includes established theories and cutting-edge developments. Presents the work of an international group of experts. Presents the

nature, origin, implications, an future course of major unresolved issues in the area.

Globalisation and National Identity in History Textbooks: The Russian Federation, the 16th book in the 24-volume book series Globalisation, Comparative Education and Policy Research, discusses trends in dominant discourses of identity politics, and nation-building in school history textbooks in the Russian Federation (RF). The book addresses one of the most profound examples of the re-writing of history following a geo-political change. Various book chapters examine debates pertaining to national identity, patriotism, and the nation-building process. The book discusses the way in which a new sense of patriotism and nationalism is documented in prescribed Russian history textbooks, and in the Russian media debate on history textbooks. It explores the ambivalent and problematic relationship between the state, globalisation and the construction of cultural identity in prescribed school history textbooks. By focusing on ideology, identity politics, and nation-building, the book examines history teachers' responses to the content of history textbooks and how teachers depict key moments in modern Russian history. This book, an essential sourcebook of ideas for researchers, practitioners and policymakers in the fields of globalisation and history education, provides timely information on history teachers' attitudes towards historical knowledge and historical understanding in prescribed Russian history textbooks.

The Pre-K-Grade 12 Gifted Education Programming Standards

should be part of every school district's repertoire of standards to ensure that the learning needs of advanced students are being met. The new edition of this popular book helps schools understand the updates to the standards, which have a renewed emphasis on equity and inclusion. The six standards focus on student outcomes in learning and development, assessment, curriculum planning and instruction, learning environments, programming, and professional learning (updated from professional development used in the 2010 version). This book details these standards and provides suggestions for implementing each one. It also includes sample assessments of student products and performances, which will assist schools in developing program and service evaluation benchmarks. This book is a must-have for school leaders and gifted education professionals who want to offer the most effective services for gifted and advanced students. It is a service publication of the National Association for Gifted Children (Washington, DC). This designation indicates that this book has been jointly developed with NAGC and that this book passes the highest standards of scholarship, research, and practice.

Considers S. 2712, to amend provisions of law relating to longevity step increases for postal employees.

The school-to-work transition is a critical part of the human life-span for young adults, their families, and society. The timing of the transition varies greatly and its co-occurrence with a number of other life transitions make it challenging to summarize or general-

ize. Individual differences and normative developmental factors, as well as external contextual factors such as global pandemics, changing economic circumstances, workplace demands, and cultural shifts, intersect to create a range of challenges and opportunities for those navigating this transition. Written by internationally renowned scholars in developmental psychology, applied psychology, counseling, and sociology, the chapters in this book highlight the trends, issues, and actions that researchers, academics, practitioners, and policy makers need to consider in order to effectively support young adults' transition to work pathways. This volume provides an explicitly international perspective on this area, broad coverage of psychological topics on the school-to-work transition, and an inclusive focus on sub-groups and minority groups, making it a must-read for those who support young adults as they move

from school to work.

"Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as vol. 26, no. 7, supplement.

This volume offers insights into the role of private supplementary tutoring in the Middle East, and its far-reaching implications for social structures and mainstream education. Around the world, increasing numbers of children receive private tutoring to supplement their schooling. In much of the academic literature this is called shadow education because the content of tutoring commonly mimics that of schooling: as the curriculum changes in the schools, so it changes in the shadow. While much research and policy attention has focused on private tutoring in East Asia and some other world regions, less attention has been given to the

topic in the Middle East. Drawing on both Arabic-language and English-language literature, this study commences with the global picture before comparing patterns within and among 12 Arabic-speaking countries of the Middle East. It presents the educational and cultural commonalities amongst these countries, examines the drivers of demand and supply of shadow education, and considers the dynamics of tutoring and how it impacts on education in schools. In addition to its pertinence within the Middle East itself, the book will be of considerable interest to academics and education policy makers broadly concerned with changing roles of the state and private sectors in education. The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.
