XOLC80 - KRISTOPHER JANELLE

"If origin defines race, then we are all Africans – we are all black. No matter how fascinatingly white one's skin is, or how classy one's accent of English is, the fact remains, the whole of humanity comes from the land of Africa. It is the cradle of our species." In this scientific literature, the celebrated Scientist Abhijit Naskar makes a humanitarian attempt with his sharp insight of the molecular realm of the mind, to unite all of humanity with the thread of biological oneness. This is a treatise of biological sciences that makes humanism triumph over the primordial evil of racial discrimination. In "We Are All Black" Naskar makes us delve deep into the neural domain of the human mind, to recognize the innate biological seeds of Racism, and empowers us to make more effective and conscientious efforts to terminate this primitive evil from the human society. We emerge from this spell-binding odyssey of science and philosophy with one sole conviction, that we are all humans coming from Africa.

African Americans in a segregated Midwestern town describe their exclusion and their own community

NEW YORK TIMES BESTSELLER New York Times bestselling author and acclaimed linguist John McWhorter argues that an illiberal neoracism, disguised as antiracism, is hurting Black communities and weakening the American social fabric. Americans of good will on both the left and the right are secretly asking themselves the same question: how has the conversation on race in America gone so crazy? We're told to read books and listen to music by people of color but that wearing certain clothes is "appropriation." We hear that being white automatically gives you privilege and that being Black makes you a victim. We want to speak up but fear we'll be seen as unwoke, or worse, labeled a racist. According to John McWhorter, the problem is that a well-meaning but pernicious form of antiracism has become, not a progressive ideology, but a religion—and one that's illogical, unreachable, and unintentionally neoracist. In *Woke Racism*, McWhorter reveals the workings of this new religion, from the original sin of "white privilege" and the weaponization of cancel culture to ban heretics, to the evangelical fervor of the "woke mob." He shows how this religion that claims to "dismantle racist structures" is actually harming his fellow Black Americans by infantilizing Black people, sett-

ing Black students up for failure, and passing policies that disproportionately damage Black communities. The new religion might be called "antiracism," but it features a racial essentialism that's barely distinguishable from racist arguments of the past. Fortunately for Black America, and for all of us, it's not too late to push back against woke racism. McWhorter shares scripts and encouragement with those trying to deprogram friends and family. And most importantly, he offers a roadmap to justice that actually will help, not hurt, Black America.

When the World Was Black: The Untold History of the World's First Civilizations (Volume Two of The Science of Self series) has been published in TWO parts. Why two? Because there are far too many stories that remain untold. We had over 200,000 years of Black history to tell – from the southern tip of Chile to the northernmost isles of Europe – and you can't do that justice in a 300-page book. So there are two parts, each consisting of 360 pages of groundbreaking history, digging deep into the story of all the world's original people. Part One covers the Black origins of all the world's oldest cultures and societies, spanning more than 200,000 years of human history. Part Two tells the stories of the Black men and women who introduced urban civilization to the world over the last 20,000 years, up to the time of European contact. Each part has over 100 helpful maps, graphs, and photos, an 8-page full-color insert in the center, and over 300 footnotes and references for further research. "In this book, you'll learn about the history of Black people. I don't mean the history you learned in school, which most likely began with slavery and ended with the Civil Rights Movement. I'm talking about Black history BEFORE that. Long before that. In this book, we'll cover over 200,000 years of Black history. For many of us, that sounds strange. We can't even imagine what the Black past was like before the slave trade, much less imagine that such a history goes back 200,000 years or more." "Part Two covers history from 20,000 years ago to the point of European contact. This is the time that prehistoric cultures grew into ancient urban civilizations, a transition known to historians as the "Neolithic Revolution."

Based on over a year of observation at a rural elementary school in the South, education researcher Dr. Rashad Anderson provides deeply nuanced accounts of powerful, illuminating, and sometimes painful examples of daily schooling experiences of five Black male students deemed as "unsalvage-

able" and "at-risk."The author constructs a vivid, thematic picture of the teacher interactions and school practices that influence pre-adolescent Black males to devalue and/or disengage from school. Through interviews with the students, teachers, administrators, parents, and analysis of student data & documents, *Wassup with all the Black Boys Sitting in the Principal's Office* takes you on an emotional walk in the shoes of students that are least often heard.

Discover the rich and complex history of the peoples of Africa, and the struggles and triumphs of Black cultures and communities around the world. With profiles of key people, movements, and events, *The Black History Book* brings together accounts of the most significant ideas and milestones in Black history and culture. This vital and thought-provoking ebook presents a bold and accessible overview of the history of the African continent and its peoples - from the earliest human migrations to modern Black communities and the African diaspora. Black history and culture beyond the African continent is also explored in detail - including the Atlantic Slave Trade; the quilombos (slave resistance camps) of Brazil; the Harlem Renaissance and Jazz Age; the "Windrush" migration; Civil Rights and Black feminist movements; and Black Lives Matter. Using the "Big Ideas" series' trademark combination of authoritative, accessible text and bold graphics, *The Black History Book* examines the achievements and struggles of Black communities across the world up to the modern day, as well as the influence of Black cultures on art, literature, and music the world over.

The essential guide to understanding how racism works and how racial inequality shapes black lives, ultimately offering a road-map for resistance for racial justice advocates and antiracists When #BlackLivesMatter went viral in 2013, it shed a light on the urgent, daily struggles of black Americans to combat racial injustice. The message resonated with millions across the country. Yet many of our political, social, and economic institutions are still embedded with racist policies and practices that devalue black lives. *Stay Woke* directly addresses these stark injustices and builds on the lessons of racial inequality and intersectionality the Black Lives Matter movement has challenged its fellow citizens to learn. In this essential primer, Tehama Lopez Bunyasi and Candis Watts Smith inspire readers to address the pressing issues of racial inequality, and provide a basic toolkit that will equip readers to become knowledgeable participants in public debate, activism, and politics. This book offers a clear vision of a racially just society, and shows just how far we still need to go to achieve this reality. From activists to students to the average citizen, *Stay Woke* empowers all readers to work toward a better future for black Americans.

Four brief "stories" about parents, trains, and cows, or is it really all one story? The author recommends careful inspection of words and pictures to both minimize and enhance confusion.

This American classic has been corrected from the original manuscripts and indexed, featuring historic photographs and an extensive biographical afterword.

The year 2003 marked the twenty-fifth anniversary of the lifting of the ban excluding black members from the priesthood of the Mormon church. The articles collected in Newell G. Bringham and Darron T. Smith's *Black and Mormon* look at the mechanisms used to keep blacks from full participation, the motives behind the ban, and the kind of changes that have--and have not--taken place within the

church since the revelation responsible for its end. This challenging collection is required reading for anyone concerned with the history of racism, discrimination, and the Latter-day Saints.

Rewriting the “origin stories” of the Anthropocene No geology is neutral, writes Kathryn Yusoff. Tracing the color line of the Anthropocene, *A Billion Black Anthropocenes or None* examines how the grammar of geology is foundational to establishing the extractive economies of subjective life and the earth under colonialism and slavery. Yusoff initiates a transdisciplinary conversation between feminist black theory, geography, and the earth sciences, addressing the politics of the Anthropocene within the context of race, materiality, deep time, and the afterlives of geology. *Forerunners* is a thought-in-process series of breakthrough digital works. The Bible gives the first and only true account of the origin of mankind. It is the only book containing an accurate record of the progress of man toward civilization, and it is the indispensable reference of all searchers after the real facts of the birth of humanity and its progress toward the civilization of today; beginning with his creation, it is the only authentic record of man; authentic because it is first hand, not a copy of something else or a scientific or literary review, but a dispassionate record of man's creation and progress, untrimmed, unshaped and unvarnished, to suit prejudice. It would not be a complete record if it did not show with the rest of them the origin of the black man and "Woe for all these pinnacle thieves"-it shows that he, the "black man" is the "father of civilization." The black man has been misrepresented by prejudiced historians and lecturers. It has been and is now quoted that Ham, the father of the black man, was cursed by his father, Noah. Now, in regard to this incident let us take the Biblical record for it, and anyone not totally blind with prejudice will be convinced by reading in the Book of Genesis the 9th Chapter from the 20th to the 27th verse inclusive,

that Noah did not, "for he could not curse" Ham, although he did in a fit of intoxication pronounce a curse on Canaan, the son of Ham.

Discusses racial barriers, identity, and interaction

The classic, bestselling book on the psychology of racism -- now fully revised and updated Walk into any racially mixed high school and you will see Black, White, and Latino youth clustered in their own groups. Is this self-segregation a problem to address or a coping strategy? Beverly Daniel Tatum, a renowned authority on the psychology of racism, argues that straight talk about our racial identities is essential if we are serious about enabling communication across racial and ethnic divides. These topics have only become more urgent as the national conversation about race is increasingly acrimonious. This fully revised edition is essential reading for anyone seeking to understand the dynamics of race in America.

In a story where the text appears in white letters on a black background, as well as in braille, and the illustrations are also raised on a black surface, Thomas describes how he recognizes different colors using various senses.

Education, like electricity, needs a conduit, a teacher, through which to transmit its power-- i.e., the discovery and continuity of information, knowledge, wisdom, experience, and culture. Through the stories and experiences of eight successful teacher-transmitters, *The Dreamkeepers* keeps hope alive for educating young African Americans. --Reverend Jesse L. Jackson, president and founder, National Rainbow Coalition In this beautifully written book Ladson-Billings illustrates the inspiring influence of a select group of teachers who keep the dreams alive for African American students. ?Henry M. Levin, David Jacks professor of Higher Education, Stanford University Ladson-Billing's portraits, interwoven with personal reflections, challenge readers to envision intellectually rigorous and culturally relevant classrooms that have the power to improve the lives of not just African American students but all children.

Beetles, a limousine, and the words in a book are a few of the items discussed in this poetic celebration of the color black from the author of *Sidewalk Trip* and *Bouncing Time*.

The Black Book of Rights: In Furtherance of the Civil Rights Movement is written in two distinct but related sections. The first section reviews law enforcement in the United States of America, citing several studies demonstrating how, despite the Civil Rights Movement's successes, Black Americans are still under attack by the Criminal Justice Regime (police, prosecutors and judges). Relevant United States Supreme Court case law is highlighted to show, 1) the progression of how courts have viewed Black Americans and their place in the United States, and 2) how close in time we are to American cultural practices and customs that were said to have detrimental effects that "are likely to be undone."The second section of the book details the various encounters you have with police officers, provides you with bullet point law and facts concerning those encounters and explains how to best position yourself for the safety and preservation of your rights in a potential criminal case. The stated goal of the *Black Book of Rights* is to reduce the number of Black men in prisons. The *Black Book* acknowledges that law enforcement is unlikely to change the tactics it deploys against Black Americans that create the disproportionality found in all aspects of the Criminal Justice Regime, so the author places the responsibility on Black America to learn their rights and asks for accountability to one another for properly invoking those rights. With approximately 90% of individuals

waiving their Miranda rights, the Black Book is critical in teaching the rights you possess during a police encounter and how to invoke those rights correctly. You're charged with the duty of education and application, because white America is not coming to save you.

"Gripping and meticulously documented."—Don Schanche Jr., Washington Post Forsyth County, Georgia, at the turn of the twentieth century, was home to a large African American community that included ministers and teachers, farmers and field hands, tradesmen, servants, and children. But then in September of 1912, three young black laborers were accused of raping and murdering a white girl. One man was dragged from a jail cell and lynched on the town square, two teenagers were hung after a one-day trial, and soon bands of white "night riders" launched a coordinated campaign of arson and terror, driving all 1,098 black citizens out of the county. The charred ruins of homes and churches disappeared into the weeds, until the people and places of black Forsyth were forgotten. National Book Award finalist Patrick Phillips tells Forsyth's tragic story in vivid detail and traces its long history of racial violence all the way back to antebellum Georgia. Recalling his own childhood in the 1970s and '80s, Phillips sheds light on the communal crimes of his hometown and the violent means by which locals kept Forsyth "all white" well into the 1990s. In precise, vivid prose, *Blood at the Root* delivers a "vital investigation of Forsyth's history, and of the process by which racial injustice is perpetuated in America" (Congressman John Lewis).

Club's fifteen best books of 2020 | A Sunday Times best book of the year Selected by students across France to win the Prix Goncourt des Lycéens, David Diop's English-language, historical fiction debut *At Night All Blood is Black* is a "powerful, hypnotic, and dark novel" (*Livres Hebdo*) of terror and transformation in the trenches of the First

World War. Alfa Ndiaye is a Senegalese man who, never before having left his village, finds himself fighting as a so-called "Chocolat" soldier with the French army during World War I. When his friend Mademba Diop, in the same regiment, is seriously injured in battle, Diop begs Alfa to kill him and spare him the pain of a long and agonizing death in No Man's Land. Unable to commit this mercy killing, madness creeps into Alfa's mind as he comes to see this refusal as a cruel moment of cowardice. Anxious to avenge the death of his friend and find forgiveness for himself, he begins a macabre ritual: every night he sneaks across enemy lines to find and murder a blue-eyed German soldier, and every night he returns to base, unharmed, with the German's severed hand. At first his comrades look at Alfa's deeds with admiration, but soon rumors begin to circulate that this super soldier isn't a hero, but a sorcerer, a soul-eater. Plans are hatched to get Alfa away from the front, and to separate him from his growing collection of hands, but how does one reason with a demon, and how far will Alfa go to make amends to his dead friend? Peppered with bullets and black magic, this remarkable novel fills in a forgotten chapter in the history of World War I. Blending oral storytelling traditions with the gritty, day-to-day, journalistic horror of life in the trenches, David Diop's *At Night All Blood is Black* is a dazzling tale of a man's descent into madness.

Black Faces, White Spaces: Reimagining the Relationship of African Americans to the Great Outdoors A leading voice for social justice reveals how he stopped arguing with white people who deny the ongoing legacy of racism—and offers a proven path forward for Black people and people of color based on the history of nonviolent struggle. "A moving personal journey that lends practical insight for expanding and strengthening the global antiracist movement."—Patrisse Khan-Cullors, co-founder of Black Lives Matter, bestselling author of *When They Call You a Terrorist* When the rallying cry "Black Lives Matter" was heard across the world in 2013, Andre Henry was one of the millions for whom the movement caused a political awakening and a rupture in some of his closest relationships with white people. As he began using his artistic gifts to share his experiences and perspective, Henry was aggrieved to discover that many white Americans—people he called friends and family—were more interested in debating whether racism existed or whether Henry was being polite enough in the way he used his voice. In this personal and thought-provoking book, Henry explores how the historical divides between Black people and non-Black people are expressed through our most mundane interactions, and why this struggle won't be resolved through civil discourse, diversity hires, interracial relationships, or education. What we need is a revolution, one that moves beyond symbolic progress to disrupt systems of racial violence and inequality in tangible, creative ways. Sharing stories from his own path to activism—from studying at seminary to becoming a student of nonviolent social change, from working as a praise leader to singing about social justice—and connecting those experiences to lessons from successful nonviolent struggles in America and around the world, Andre Henry calls on Black people and people of color to divest from whiteness and its false promises, trust what their lived experiences tell them, and practice hope as a discipline as they work for lasting change.

"A powerful — and personal — account of the movement and its players."—The Washington Post

“This perceptive resource on radical black liberation movements in the 21st century can inform anyone wanting to better understand . . . how to make social change.”—Publishers Weekly The breadth and impact of Black Lives Matter in the United States has been extraordinary. Between 2012 and 2016, thousands of people marched, rallied, held vigils, and engaged in direct actions to protest and draw attention to state and vigilante violence against Black people. What began as outrage over the 2012 murder of Trayvon Martin and the exoneration of his killer, and accelerated during the Ferguson uprising of 2014, has evolved into a resurgent Black Freedom Movement, which includes a network of more than fifty organizations working together under the rubric of the Movement for Black Lives coalition. Employing a range of creative tactics and embracing group-centered leadership models, these visionary young organizers, many of them women, and many of them queer, are not only calling for an end to police violence, but demanding racial justice, gender justice, and systemic change. In *Making All Black Lives Matter*, award-winning historian and longtime activist Barbara Ransby outlines the scope and genealogy of this movement, documenting its roots in Black feminist politics and situating it squarely in a Black radical tradition, one that is anticapitalist, internationalist, and focused on some of the most marginalized members of the Black community. From the perspective of a participant-observer, Ransby maps the movement, profiles many of its lesser-known leaders, measures its impact, outlines its challenges, and looks toward its future.

Many advocates of all-black male schools (ABMSs) argue that these institutions counter black boys' racist emasculation in white, "overly" female classrooms. This argument challenges racism and perpetuates antifeminism. Keisha Lindsay explains the complex politics of ABMSs by situating these schools within broader efforts at neoliberal education reform and within specific conversations about both "endangered" black males and a "boy crisis" in education. Lindsay also demonstrates that intersectionality, long considered feminist, is in fact a politically fluid framework. As such, it represents a potent tool for advancing many political agendas, including those of ABMSs supporters who champion antiracist education for black boys while obscuring black girls' own race and gender-based oppression in school. Finally, Lindsay theorizes a particular means by which black men and other groups can form antiracist and feminist coalitions even when they make claims about their experiences that threaten bridge building. The way forward, Lindsay shows, allows disadvantaged groups to navigate the racial and gendered politics that divide them in pursuit of productive—and progressive—solutions. Far-thinking and boldly argued, *In a Classroom of Their Own* explores the dilemmas faced by professionals and parents in search of equitable schooling for all students—black boys and otherwise.

Even in 1960s Detroit, race isn't everything. Tom Daniels and "Cookie" Marsh will be the first to tell you that race isn't everything. But it did shape the way they experienced the world growing up in Detroit in the 1950s and 60s. Tom "Cookie" Marsh grew up in a black neighborhood on Detroit's west

side. Tom Daniels grew up in a mixed, working-class neighborhood on Detroit's east side. Both men grew up in strict households where they "always got what we needed, and sometimes what we wanted" and both saw their city, their country, and their world transform around them through the Civil Rights movement, riots, and the Viet Nam War. But sometimes parallel lines intersect. As each man tells his story, it is apparent that race isn't just "black and white" but it is part of what makes their friendship extraordinary. Their experiences will show you that race made for huge differences in their experiences, while, in spite of race, there are also touching similarities that made it possible for two men, in their older years, to overcome decades of racial turbulence of their upbringing to become lifelong friends. Follow Tom and Cookie. Hear about their lives, their upbringing, their successes and regrets growing up in black and white Detroit - and how when it boils down to it, the things that are truly important are actually black and white, like you and me.

Tells the forgotten story of Black star-quality athletes excluded from professional baseball because of the big league's color line

Countless African Americans have passed as white, leaving behind families and friends, roots and communities. It was, as Allyson Hobbs writes, a chosen exile. This history of passing explores the possibilities, challenges, and losses that racial indeterminacy presented to men and women living in a country obsessed with racial distinctions.

Describing her struggle as a black woman with an eating disorder that is consistently portrayed as a white woman's problem, this insightful and moving narrative traces the background and factors that caused her bulimia. Moving coast to coast, she tries to escape her self-hatred and obsession by never slowing down, unaware that she is caught in downward spiral emotionally, spiritually, and physically. Finally she can no longer deny that she will die if she doesn't get help, overcome her shame, and conquer her addiction. But seeking help only reinforces her negative self-image, and she discovers her race makes her an oddity in the all-white programs for eating disorders. This memoir of her experiences answers many questions about why black women often do not seek traditional therapy for emotional problems.

Every day, a child is either happy or crying after school, - sometimes due to the action of another child. 'Black, Brown or White - We All Feel' aims to inspire all readers to do something small to make a difference in their communities, schools, and homes. This book shares ways on how our children can engage with each other politely. Also, it brings awareness as to how our children can become accepting of others and how we can treat all with fairness, compassion, patience, gentleness and kindness. They must understand that we also become happy by making others happy. This helps make our world a little better and more comfortable place to be. Sowing seeds of hatred in your children may come back to haunt us. As you read this book to your children, you're planting good seeds in them. As it's written, "Train up a child in the way he should go, and when he is old he will not depart from it." Proverbs 22:6

INSTANT NEW YORK TIMES BESTSELLER An urgent primer on race and racism, from the host of the viral hit video series "Uncomfortable Conversations with a Black Man" "You cannot fix a problem you do not know you have." So begins Emmanuel Acho in his essential guide to the truths Americans need to know to address the systemic racism that has recently electrified protests in all fifty states. "There is a fix," Acho says. "But in order to access it, we're going to have to have some uncomfort-

able conversations.” In *Uncomfortable Conversations With a Black Man*, Acho takes on all the questions, large and small, insensitive and taboo, many white Americans are afraid to ask—yet which all Americans need the answers to, now more than ever. With the same open-hearted generosity that has made his video series a phenomenon, Acho explains the vital core of such fraught concepts as white privilege, cultural appropriation, and “reverse racism.” In his own words, he provides a space of compassion and understanding in a discussion that can lack both. He asks only for the reader’s curiosity—but along the way, he will galvanize all of us to join the antiracist fight.

The epic history of African American women's pursuit of political power -- and how it transformed America. In the standard story, the suffrage crusade began in Seneca Falls in 1848 and ended with the ratification of the Nineteenth Amendment in 1920. But this overwhelmingly white women's movement did not win the vote for most black women. Securing their rights required a movement of their own. In *Vanguard*, acclaimed historian Martha S. Jones offers a new history of African American women's political lives in America. She recounts how they defied both racism and sexism to fight for the ballot, and how they wielded political power to secure the equality and dignity of all persons. From

the earliest days of the republic to the passage of the 1965 Voting Rights Act and beyond, Jones excavates the lives and work of black women -- Maria Stewart, Frances Ellen Watkins Harper, Fannie Lou Hamer, and more -- who were the vanguard of women's rights, calling on America to realize its best ideals.

The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this “vital, necessary, and beautiful book” (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and “allows us to understand racism as a practice not restricted to ‘bad people’ (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.
